Dear Iris,

Please address following issues.

Q#1: Since this device has incorporated a USB port that it's subject to PC peripheral; so please provide an updated label format to include FCC DoC logo if DOC rule is followed. Or please submit another application with equipment code of JBP.

Q#2: The operational description provided is identical to the user manual. Please provide the correct one.

Q#3: Please provide RF functional block diagram.

Q#4: Please provide complete RF portion's schematics.

Q#5: Page 52-54, the test plot of output power shown the transmitter is 802.11a which can't match the frequency measured. Please correct.

Ans: Because for OFDM modulation no matter it's 802.11a or g, our test equipment always appears 802.11a. It doesn't influence the testing result.

Best Regards,

Lucy Tsai
CCS

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
